

# SUMMIT<sup>®</sup>

BY PARKER FREEZE DRY

## SPECIFICATIONS

DIMENSIONS (DOORS OPEN)	62L x 130W x 84H (Inches)
WEIGHT	2700lbs
MAXIMUM WET PRODUCT VOLUME	97.5 lbs.
MAXIMUM REMOVABLE CARTRIDGE CAPACITY	1
MAXIMUM TRAY CAPACITY (STANDARD C-15H)	15 / 12 / 9
MAXIMUM GALLON VOLUME	22.5 Gal.
POWER REQUIRED	230V / 60 AMP/ Single Phase
SHELF AREA	48.75 Sq. Ft.
POWER USAGE	43.5 FLA, 26 RLA
MAXIMUM VACUUM	1MB / 750 Microns
REFRIGERANT TYPE	R507
CHAMBER STANDARD OPERATING (dB)	70 db.
WARRANTY	2 years*
SHELF TEMP RANGE	-50 to 200° F
PRICE	\$155,000 USD (as equipped)

# SUMMIT<sup>®</sup>

BY PARKER FREEZE DRY

The Parker Summit series was designed for those who are ready to scale their business with a turnkey design that does not compromise quality or results. The Summit is built with the same materials and capabilities as our larger machines, with less capacity. The main difference between our larger sized Parker freeze dryers and the Summit is that the refrigeration system and vacuum pumps are built into the machine rather than being separate components. On 15 individually heated trays, the machine can process up to 97.5 lbs. of wet product weight. Parker Freeze Dry's proprietary operating software, which is available for all Parker models, makes it simple to achieve consistent results. All Parker Freeze Dry systems provide recipe flexibility, recipe recall, key performance indicators, real-time feedback, and other benefits. The Summit's quality and durability is superior to the competitors.
